Benbell Softener Systems

..... Towards a great tomorrow.

Disadvantages of Hard Water

- Skin ailments like dryness, itching and rashes.
- Destruction of skin cells.
- Acute eczema in children.
- Acne, even effects texture and colour of skin.
- Dead, dull and sticky hair.
- Loss of hair leading to baldness.
- Stains on cutlery, kitchenware and sinks.
- Scaling in sanitary pipes.
- Salt deposition and scaling on sanitary fittings.
- Pipe choking in geysers and dish-washers.
- Ineffectiveness and wastage of soaps and detergents-
Washing does not produce lather freely with soap as a result cleansing quality of soap is decreased and lot is wasted. Hard water reacts with soap and produces sticky precipitates of Calcium and Magnesium which are insoluble. No freshness and shine in washed laundry.
- Bathing -*Hard water does not freely form lather but produces a sticky scum on bath tub and body. This not only clogs the pores but also irritates the skin making it itchy, flaky and dry. In some cases excessive dryness and redness in scalp is observed (rosacea).*

Miracles of Soft Water

- Healthy, glossy and shiny hair.
- Protects delicate skin of babies.
- Keeps the skin glowing and soft.
- Foamy bath.
- Increases effectiveness of soaps, detergents and shampoos.
- Shining kitchenware and cutlery / spotless sink.
- Retains the finish and life of sanitary fittings.
- Glossy car wash.
- Prevents scale build up in pipes and fittings.
- Reduction in electricity bills.

Benbell Softener Systems

..... Towards a great tomorrow.

Fully engineered and customized solutions to your complete satisfaction.

S.No.	Model	Flow Rate	Resin Volume
1	BSSA1	2000 LPH	50 Ltr
